

## # Requirements

- Silent Hunter 3 with the GWX mod installed
- imagemagick package (for the mogrify tool)
- python 3
- LaTeX with pdflatex

## Usage

- Clone this repo onto your system. It will be your “working directory”
- Make the scripts executable if necessary

```
chmod +x get_images.sh
chmod +x get_ship_info.py
chmod +x generate_latex_file.py
```

- First run `get_images.sh`
- Then run `get_ship_info.py`
- Finally run `generate_latex_file.py`

If you dont want to automatically generate the PDF file then set the following line in `generate_latex_file.py` to False:

```
compile_pdf = True
```
